WHAT IS CLAIMED IS:

1. An information terminal comprising:

an information history list display section for displaying history information of communication in connection with a processing state of the history information in accordance with history related information indicating the processing state of the history information.

2. The information terminal according to claim 1, further comprising:

a history management section for recording the history information about communication; and

an information management table for recording the history related information that indicates the processing state of the history information stored in said history management section.

3. The information terminal according to claim 2, wherein

said information management table records relationships between the history information stored in said history management section as the history related information; and

said information history list display section displays the history information in connection with the history information about that history information in accordance with the history related information stored in said information management table.

4. The information terminal according to claim 2, wherein said information history list display section displays the history information about communication by a plurality of different communication means together.

5. The information terminal according to claim 2, further comprising:

a personal address book for recording a personal name of a communication party and a communication address of the communication party; and

an address book search section for searching said personal
5   address book, wherein

said information history list display section displays the personal name in substitution for the communication address included in the history information stored in said history management section in accordance with a retrieval result from said personal address book
10 by said address book search section.

6. The information terminal according to claim 1, wherein said information history list display section receives the history information and the history related information from a server, and
15 displays the received history information in connection with the processing state of the history information in accordance with the received history related information.

7. The information terminal according to claim 1, further comprising:
20   a history management section for recording the history information about communication,

wherein said information history list display section receives the history related information indicating the processing state of the history information from a server, and displays the history
25 information in connection with the processing state of the history information in accordance with the received history related information.

8. The information terminal according to claim 1, further comprising:
30   an information management table for recording the history

related information that indicates the processing state of the history information about communication stored in a server, and

wherein said information history list display section receives the history information about communication from said server, and

5 displays the received history information in connection with the processing state of the history information in accordance with the history related information stored in said information management table.

10 9. A server comprising:

a personal information management section for transmitting, in response to a request from an information terminal that displays history information about communication in connection with a processing state of the history information, requested information

15 to said information terminal.

10. The server according to claim 9, further comprising:

a history management section for recording the history information about communication; and

20 an information management table for recording history related information that indicates a processing state of the history information stored in said history management section,

wherein said personal information management section transmits the history information stored in said history management section and

25 the history related information stored in said information management table to said information terminal in response to a request from the information terminal.

11. The server according to claim 9, further comprising:

30 an information management table for recording history related

information indicating a processing state of the history information
about communication,

wherein said personal information management section transmits
the history related information stored in said information management
5   table to said information terminal in response to a request from the
information terminal.

12. The server according to claim 9, further comprising:

a history management section for recording history information
10   about communication,

wherein said personal information management section transmits
the history information stored in said history management section to
said information terminal in response to a request from the information
terminal.

15

13. An information display system including an information terminal
and a server capable of communicating with each other, said information
display system comprising:

a history management section for recording history information
20   about communication;

an information management table for recording history related
information that indicates a processing state of the history
information stored in said history management section; and

an information history list display section for displaying the
25   history information in connection with the processing state of the
history information in accordance with the history related
information stored in said information management table.

14. The information display system according to claim 13, wherein
30   said server comprises said history management section and said

information management table, along with a personal information management section for transmitting the history information stored in said history management section and the history related information stored in said information management table to said information

5 terminal, wherein said information terminal comprises said information history list display section, and wherein said information history list display section receives the history information and history related information transmitted from said personal information management section.

10

15. The information display system according to claim 13, wherein said server comprises said information management table, along with a personal information management section for transmitting the history related information stored in said information management table to said information terminal, wherein said information terminal

15 comprises said history management section and said information history list display section, and wherein said information history list display section receives the history related information transmitted from said personal information management section.

20

16. The information display system according to claim 13, wherein said server comprises said history management section, along with a personal information management section for transmitting the history information stored in said history management section to said

25 information terminal, wherein said information terminal comprises said information management table and said information history list display section, and wherein said information history list display section receives the history information transmitted from said personal information management section.

30

17. An information display method comprising the steps of:

recording history information about communication;

recording history related information indicating a processing state of the history information; and

5   displaying the history information in connection with the processing state of the history information in accordance with the history related information.
